INTRODUCING

Furtado Forest Products

DIMENSIONAL CEDAR

EXPERIENCE REAL WESTERN RED CEDAR

SOURCED FROM BEAUTIFUL, ALASKAN & BRITISH COLUMBIAN FIBERS, THIS HIGH-END ARCHITECTURAL FEATURE CAN ADD MULTIPLE LEVELS OF DEPTH TO ANY OF YOUR CUSTOMER'S BUILDS.

DENSITY & STABILITY

WESTERN RED CEDAR IS HYGROSCOPIC AND WILL ABSORB OR DISCHARGE MOISTURE TO ATTAIN EQUILIBRIUM WITH THE SURROUNDING ATMOSPHERE, HOWEVER WRC ALSO HAS A VERY LOW SHRINKAGE FACTOR. THE LOW DENSITY OF WESTERN RED CEDAR MAKES IT AN EASY WOOD TO TRANSPORT AND HANDLE.

HIGH-END APPEARANCE

OUR DIMENSIONAL CEDAR IS SOURCED PRIMARILY FROM COASTAL FIBERS IN BC & ALASKA. THIS GIVES IT A NATURAL DARK BROWN HUE AND HIGH-END APPEARANCE THAT CAN BREATHE NEW LIFE INTO ANY OF YOUR CUSTOMER'S BUILDS.

DURABLE & ROT-RESISTANCE

WESTERN RED CEDAR HAS NATURAL OILS WHICH HELP PREVENT MOLD AND MILDEW. ITS NATURAL RESISTANT TO ROT, DECAY AND INSECT ATTACKS, MEANS ANYTHING YOU BUILD WITH IT WILL LAST LONGER AND REQUIRE LESS MAINTENANCE.

ENERGY EXPENDITURE

WOOD PRODUCTS REQUIRE MUCH LESS ENERGY TO PRODUCE THAN CONCRETE OR STEEL. ADDITIONALLY, CEDAR POSSESSES NATURALLY OCCURRING THERMAL PROPERTIES, SO IT SAVES EVEN MORE ENERGY & MONEY WHEN IT COMES TO HEATING AND COOLING HOMES. FAR MORE SUPERIOR THAN BRICK, STEEL, AND CONCRETE.

A Step Above

CHOOSE WESTERN RED CEDAR FOR ITS GORGEOUS AESTHETICS, INSECT-RESISTANCE, DURABILITY, AND ENVIRONMENTAL SUSTAINABILITY WHEN COMPARED TO ALTERNATIVES.

RANGE OF DIMENSIONS

DIMENSIONS:

2X2 THROUGH TO 2X12

6 FEET THROUGH TO 20 FEET

IN YOUR CHOICE OF GRADES:
